

WAHIDIN ALAMBIYAH

SENIOR JAVA BACKEND DEVELOPER | SPRING BOOT, MICROSERVICES, REST API | DEVOPS & CLOUD DEPLOYMENT

Address: South Tangerang, Banten Indonesia

Phone: +62 857 2004 6376

Email: wahidin.alambiyah@gmail.com

SUMMARY

Senior Java Backend Developer with 10+ years of experience in backend development, REST API, system integration, and enterprise application maintenance. Experienced in Java, Spring Boot, Hibernate, relational databases, Linux deployment, Docker, Kubernetes, and CI/CD pipelines using GitLab CI, Jenkins, and Bitbucket Pipelines.

In recent roles, involved in banking and logistics systems, production support, cloud deployment, and cross-functional collaboration with product, QA, DevOps, and internal client teams. Also experienced in leading small engineering teams and supporting delivery from development to production.

WORK EXPERIENCE

Lead Backend Dev (DevOps - ICE Team), Bumi Amarta Teknologi **Oct 2023 - Jul 2025**

(Contract Placement at Bank Sinarmas)

- Automate deployment pipelines from development to production using GitLab CI, Jenkins, Bitbucket Pipelines.
- Deploy to Linux servers, Kubernetes, Alibaba Cloud ACK, and Function Compute.
- Managed deployments to various target environments including Linux dedicated servers, Kubernetes, Alibaba Cloud ACK, and Function Compute.
- Collaborated with cross-functional teams such as the core DevOps team and internal divisions of Bank Sinarmas during project setup and system integration.
- Ensured deployment automation is secure, scalable, and optimized for performance and maintainability.
- Developed and maintained backend services and REST APIs using Java, Spring Boot, Hibernate, and relational databases.
- Supported application deployment, troubleshooting, and post-release validation across development, staging, and production environments.
- Worked with Linux servers, Docker, Kubernetes, Alibaba Cloud ACK, and CI/CD pipelines to support reliable software delivery.
- Collaborated with cross-functional teams to investigate production issues, improve deployment flow, and maintain application stability.

E-Commerce Development Developer, Tri Adi Bersama (Anteraja) **Mar 2020 - Sep 2023**

- Managed several projects, including E-Bill, a billing system for B2B clients; PVS, a pricing configuration application; FVP, a logging application that tracks package status deliveries; RekrutAja, a recruitment application; CRM CMS; and SFI.id.
- Led the SFI.id project team, consisting of 6-8 developers and testers.

Lead Backend Developer, Indocyber Global Teknologi (Iglo) **Mar 2019 - Feb 2020**

- Oversaw various projects at Anteraja, such as E-Bill, a billing system designed for B2B clients; PVS, a pricing configuration tool; FVP, an application for tracking package delivery statuses.

Java Developer/Fullstack, Indo Corpora Investama (Padiciti)

Feb 2016 - Mar 2019

- Oversaw the complete lifecycle maintenance of all applications, encompassing web, service, job scheduling, and payment integration.
- Connected the system with third-party services to incorporate new payment channels, including XL Axiata, Finnet Finpay, Credit Card via Sprint Asia and Bank Transfers.
- Established payment channels for Padipay merchants.
- Upgraded and optimized the booking order system for train and flight services by adding a waiting list feature.

Java Developer/Fullstack, Venturium System Indonesia (VenSys)

Oct 2014 - Feb 2016

- Responsible for maintaining a web application, scheduling jobs and services, and fixing bugs.
- Developed a library to read files in SWIFT format using Java.
- Conducted feasibility studies and risk assessments to mitigate potential project risks.
- Collaborated with clients, resulting in a 25% increase in customer satisfaction.

EDUCATION

Diploma in Informatics Management

Sep 2012 - May 2015

Universitas Nasional PASIM

ADDITIONAL INFORMATION

Technical Skills

- **Programming Languages:** Java (Spring Boot, Spring MVC, Hibernate), JavaScript, TypeScript
- **Frontend Frameworks:** Angular, Vue.js
- **Databases:** MySQL, PostgreSQL, SQL Server, MongoDB, Redis
- **DevOps & Tools:** GitLab CI, Jenkins, Bitbucket, Azure DevOps, Google Cloud Storage, RabbitMQ, Kafka, Disconf
- **Others:** Postman, WebSocket, Bottomline GTFrme, Pentaho, Microsoft Office (Word)
